

Setting up T-Mobile GPRS, WAP and MMS on a Pocket PC device

This article applies to the Pocket PC 2003 and Windows Mobile 5.0 platforms

Setting up the GPRS connection

Tap on **Start** and select **Settings**
Tap on the **Connections** tab at the bottom of the screen
Tap on the **Connections** icon
In the **My ISP** section, tap on the option to **Add a new modem connection**
In the **Name** field, type in **T-Mobile GPRS**
In the **Modem** field, select **Cellular Line (GPRS)**
Tap **Next**
In the **Access Point Name** field, type in **general.t-mobile.uk**
Tap **Next**
Leave the **User Name**, **Password** and **Domain** fields blank
Tap **Finish**

Setting up the WAP connection

Tap on **Start** and select **Settings**
Tap on the **Connections** tab at the bottom of the screen
Tap on the **Connections** icon
In the **My Work Network** section, tap on the option to **Add a new modem connection**
In the **Name** field, type in **T-Mobile WAP**
In the **Modem** field, select **Cellular Line (GPRS)**
Tap **Next**
In the **Access Point Name** field, type in **general.t-mobile.uk**
Tap **Next**
In the **User Name** field enter **user**
In the **Password** field enter **wap**
Leave the **Domain** field blank
Tap **Finish**

Setting up the MMS account

Tap on **Start** and select **Messaging**
Tap on the **Menu** button and select **MMS Configuration**
Tap on the **Servers** tab at the bottom of the screen
Tap on the **New** button
In the **Server Name** field enter **T-Mobile MMS**
In the **Gateway** field enter **149.254.211.010**
In the **Port Number** field enter **9201**
In the **Server Address** field enter <http://mmsc.t-mobile.co.uk:8002>
In the **Connect Via** field, select **My Work Network**
Leave the rest of the fields at their default value.
Tap **OK**
Tap the **Set As Default** button
Tap **OK**

Your device has now been configured.
